- COMMAND CONSOLE
- COMPLIANCE CHECKS
- MANAGEMENT INFORMATION
- DOCUMENT MANAGEMENT

Software has become the central hub to the operations of all players in the Insurance market. In many companies a plethora of different systems provide information on different parts of the business, requiring disparate skills sets, cross referencing and complex analysis to really see what is going on. eNOVUS provides a single system for Reinsurance or Direct Brokers and other Intermediaries with a host of features and tools to record, manage and analyse the whole company's activities.

eNOVUS provides Risk and Claims Management for all classes of business. Binders, Lineslips and Open/Subscription Market as well as Inward Bordereaux loads allows maximum data retention and assists with Solvency II compliance. The integrated multi currency, IBA, Nominal and Purchase ledgers deliver complete financial, cash management and funding controls. Insurance Document Production from Slips, Quotes, Policies & Covernotes to Endorsements, Debit notes and Statements are automatically indexed and retrieved. eNOVUS is FSA and Lloyd's compliant with Premium & Claims accounting tools and integrated electronic connectivity to Xchanging. An extensive library of reports is available or perhaps you want one of your own... no problem.

MORNING DATA

SUMMING UP...

It really can be possible to have a secure, reliable, compliant, comprehensive system to store and manage your business centrally, accessible from anywhere in the world and provided by an experienced, knowledgeable and highly skilled team, it is time your systems don't hold you back.

WITNESS STATEMENTS...

Meridian opted for Morning Data to host eNOVUS for the company. For all those wondering about going with a company located in Dorset for support, Morning Data is a prime example to prove any critics wrong. Morning Data have provided friendly, good support and communication, which is vital when making a big change within any organisation.

Paula Duplock *Meridian Risk Solutions*

The support and co-operation we are receiving from the Morning Data team is exceptionally superb. We regret to have wasted four years with our previous suppliers.

Zeru Woldermichael *CEO, NICE*

For some long time we had looked for a system which would bring us a totally integrated relationship with our supplier. With Morning Data we are confident we made the right decision.

Steve Allen *Kinetic Insurance Brokers*

TO ACHIEVE A SUCCESSFUL EXECUTION: THREE COST EFFICIENT, DELIVERY OPTIONS...

CS is the classic client server configuration and is the most cost effective solution for those already employing a client server infrastructure **CS** is designed using state of the art virtualised server technology.

I3, best option for companies with significant in house IT infrastructure. With a single virtualized server **I3** is deployed using thin client technology. Remote access is simple, the system is available in a web browser, even smart phones and PDA's.

Z3 is ideal for start-up companies and those who want no infrastructure or hardware on site. All you need is internet access and a browser. Like **I3**, you can access **Z3** from anywhere - airports, internet cafes, even on the move.
