

HELIX

Policy Administration System

What is HELIX?

HELIX is an end-to-end policy administration system with an emphasis on the Captive and Carrier market.

As an end-to-end policy administration solution, HELIX allows organisations to manage Policy, Transaction, Claims, and Stakeholder data.

The financial focus of the HELIX system ensures that prudent processes are followed when it comes to the movement of money.

HELIX sets itself out from the competition with the vast number of data capture points available. Additionally, HELIX has the functionality to enrich data using micro services. If a client has a micro service which they wish to connect to HELIX, the Morning Data development team are able to explore all avenues to achieve this functionality.
